

Containers

for special waste and other

Composters and Silos

What is suitable for composting:

- fruit and vegetable waste,
- coffee grounds and tea leaves,
- skin – citrus peel (in small amounts),
- brown cardboard and newspaper (in small amounts),
- eggshells, small animal droppings, leaves, wilted flowers,
- small amounts of turf,
- garden waste broken into small pieces,
- wood wool, wood chips, sawdust, etc. (in small amounts).

Composters

- ▶ Designed for composting household and garden waste.
- ▶ Design suitable for use in both summer and winter. Simple to install without the need for tools.
- ▶ Open bottom (to allow free contact with the soil and give access to micro-organisms, maggots, and earthworms).
- ▶ Fitted with side doors to remove compost and openings to allow air flow.
