

# Containers

## residential and sanitary

- ▶ **Residential and sanitary containers can be custom-made to your specifications.**
- ▶ Residential containers are self-supporting by design and are transported and delivered as a turnkey building.
- ▶ The welded steel frame is resistant to collapse. The frames are modified in line with ISO standards and can be placed and interconnected side by side, back to back, or on top of each other as needed.
- ▶ Removing exterior walls or installing partitions makes it possible to create a space of any size (office, gatehouse, sanitary facility, ...).
- ▶ Outstanding insulation properties help reduce operating costs. Overall, these containers represent a quick and economical solution which can later be reused in another location as needed.

### The containers consists of:

- ▶ welded steel frame,
- ▶ galvanised, painted walls made of 0.60 mm thick sheets,
- ▶ roof made of a trapezoidal, galvanised 0.63 mm thick sheet with insulation and a vapour barrier,
- ▶ laminated particle board walls with a white paint finish, or with wood décor, with vapour barrier and insulation.
- ▶ Can be supplied with a number of extras, such as grilles for the windows and doors.
- ▶ Interior height: 2350 mm.

### Available accessories:

- ▶ Floor: 22 mm cemented board, 1.5 mm PVC, insulation.
- ▶ Entrance door: 875 × 2000 mm.
- ▶ Interior door: 875 × 2000 mm, 625 × 2000 mm.
- ▶ ISO window: 945 × 1200 mm with blinds, 600 × 600 mm.
- ▶ Electrical wiring: standard (lights, sockets).
- ▶ Heating: panel convector heaters 0.5 / 2 kW.
- ▶ Toilet, basin, taps, boiler, shower, drain hole, water/ sewerage connection, interior partitions.
- ▶ Colour design: from the RAL colour chart.
