

Medical Cases and medical bags

Cases

- ▶ Perfectly air-tight and water-tight, made of thick polypropylene resin. Neoprene seal guarantees reliably hermetically sealed contents, even if submerged in water for extended periods.
- ▶ Resistant to low and high temperatures, sand, dust, humidity, corrosion, and impact.
- ▶ Strong handles with anti-slip surface, two-position locks with sturdy hinges and nylon pins.
- ▶ Fitted with a pressure valve which quickly balances the internal pressure in case of sudden changes in altitude or temperature.
- ▶ Without interior dividers.

Type **7594**

1.7 kg

Type **7595**

366 × 464 × 176 mm

2.8 kg

Type **7596**

438 × 566 × 216 mm

3.9 kg

Bags

- ▶ Made of water-resistant nylon.
- ▶ Main compartment divided into three sections, two pockets on the sides, and one large pocket on the front.
- ▶ Transparent pocket on the outside to carry a list of medical materials, on the inside a pocket for documentation, and rubber loops for small tools.
- ▶ All pockets along the perimeter of the bag have a zip.
- ▶ Plastic feet on the underside.
- ▶ Made of nylon, resistant to wear.
- ▶ Insulating walls allow for the storage and transport of temperature-sensitive materials (insulin, etc.).
- ▶ Two isothermic storage compartments.
- ▶ Inside, the bag is fitted with loops for fastening bottles or medical instruments and transparent pockets for small-sized medical material.
